ACT-IAC Voyagers Class of 2022 Selected

September 17, 2021 - Fairfax, VA. – The American Council for Technology and Industry Advisory Council (ACT-IAC), the premier public-private partnership dedicated to advancing government through the application of information technology, today announced its 2022 Voyagers Program participants. This nine month leadership and professional development program engages government and industry professionals to collectively learn, develop and prepare for future leadership roles in federal IT.

The ACT-IAC Voyagers Program is the only leadership and professional development program of its kind that allows an open and trusted partnership for government and industry mid-level professionals. The 2022 Voyagers Program participants were nominated by their respective government agency or company sponsor and evaluated by a panel of senior government and industry executives on their individual professional leadership accomplishments and their potential for future advancement within their organization.

We are delighted to once again be able to bring together an outstanding group of government and industry professionals for this year’s Voyagers class,” said Dave Wennergren, ACT-IAC CEO. “The skills honed and experiences gained through the Voyagers program are great examples of the embodiment of ACT-IAC’s mission to accelerate government outcomes, foster collaboration and build relationships that last a lifetime.
